EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jean Lockyer on 1/10/08.

The application has been amended as follows:

The status of claims 65 and 68 as "withdrawn" have been changed to ---withdrawn-originally presented---.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: there is no prior art that teaches the claimed method wherein an autoinhibited responder complex is the responder molecule that is covalently linked to the inhibitor and to a binding pair member. The responder is inactive because it is covalently linked to the inhibitor. The reactivator complex comprises a reactivator that is covalently linked to another binding pair member (or candidate binding pair member). The responder molecule can be activated when the reactivator displaces the inhibitor from the responder. Thus, when the two

binding pair members bind to one another, the reactivator is brought into proximity to the auto-inhibited responder and can then displace the inhibitor. See applicants' stipulation at page 10, paragraphs 2 and 3 of the 10/22/07 REMARKS.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
